Hiding Dinosaurs Mobile

You will need:

Cardstock (or other heavy paper)
Scissors
Hole punch
String (Fishing line or bead string)

Instructions

1. Print all but this page double sided. It works best on heavy paper, like cardstock.

2. Cut around the outlines shown.

3. Use a hole punch to make holes where indicated.

4. Cut into the two sections of the egg carton along the dotted lines.

5. Fit these two egg carton sections together in a criss-cross. Make sure that the artwork lines up in the middle.

6. Using the string, tie together the pieces of the mobile so that the dinosaurs hang from the egg carton. See diagram at right.

7. Tie another piece of string between the two top holes of the mobile. Use this string to hang the mobile.
